

Elite

Commercial
Industrial / Residential

The Elite series simulates the look of Dutch clay tiles, with an offset wave pattern and a 1/2" step every 16" across the panel. The galvanized panels are made to custom lengths of up to 40', eliminating leaky horizontal seams. They can be quickly installed over existing shingles or over 1" x 4" horizontal strapping with approved building paper. For new construction, sheeting may not be required, always check your local building codes.

- Dutch clay-tile look
- Custom-cut full-length sheets
 - 2' 8" panel lengths for small areas
- DuraFlex custom silicone polyester ceramic paint finish
- Anti-siphon water-channel system for a virtually leak-free roof
- 26 gauge steel

Steel Tile manufactures a solid line of roofing tiles and accessories that are durable, stylish, cost-efficient and virtually leak-proof.

Home and cottage owners, institutions, builders and architects have all discovered the long-lasting Steel Tile advantage.
