

Slate Shake

With a 5/8" step spaced every 16" across the panel, the Slate Shake looks like a real slate or cedar shake roof, but with far fewer seams. The galvanized panels are made to custom lengths of up to 29', eliminating leaky horizontal seams. They can be installed directly over existing shingles or over 1" x 4" horizontal strapping with approved building paper. For new construction, sheeting may not be required, always check your local building codes. Visit our website for updated colour choices and finishes.

- Slate or cedar shake-roof profile
- Custom-cut full-length sheets
- 2' 8" panel lengths for small areas
- Variety of colour and paint finishes available
- Anti-siphon water-channel system for a virtually leak-free roof
- 26 gauge steel

**Commercial
Industrial / Residential**

Steel Tile manufactures a solid line of roofing tiles and accessories that are durable, stylish, cost-efficient and virtually leak-proof.

Home and cottage owners, institutions, builders and architects have all discovered the long-lasting Steel Tile advantage.
